

10 Addition of 2-digit Numbers

▲ Calculate.

$$\begin{array}{r} 13 \\ + 50 \\ \hline \boxed{63} \end{array}$$

$$\begin{array}{r} 9 \\ + 77 \\ \hline \boxed{86} \end{array}$$

$$\begin{array}{r} 56 \\ + 35 \\ \hline \boxed{91} \end{array}$$

$4. 47 + 42 = \boxed{89}$

$5. 17 + 4 = \boxed{21}$

$6. 55 + 15 = \boxed{70}$

$7. 74 + 19 = \boxed{93}$

Solve the following problems.

8. Sam has 17 story books. Dad gives him 45 more.

How many story books does Sam have altogether?

$$\begin{array}{r} 17 + 45 \\ \hline = \boxed{62} \end{array}$$

$$\begin{array}{r} \boxed{17} \\ \oplus \boxed{45} \\ \hline \boxed{62} \end{array}$$

Sam has 62 story books altogether.

▲ 9. After David gives 16 cookies to Grandma, there are 20 cookies left. How many cookies are there at first?

$$\begin{array}{r} 16 + 20 \\ \hline = \boxed{36} \end{array}$$

$$\begin{array}{r} \boxed{16} \\ \oplus \boxed{20} \\ \hline \boxed{36} \end{array}$$

There are 36 cookies at first.
