Going to the beach
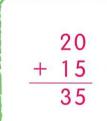

Solve the following problems.

①

20 people waits for the bus and 15 people waits for the minibus. How many people are there altogether?
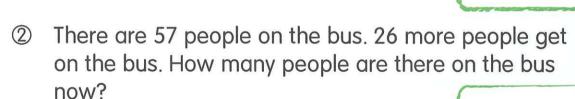

$$\boxed{20} \oplus \boxed{15}$$
$$= \boxed{35}$$

There are __35__ people altogether.

$$\begin{array}{r} 20 \\ +\ 15 \\ \hline 35 \end{array}$$

② There are 57 people on the bus. 26 more people get on the bus. How many people are there on the bus now?

$$\underline{57 + 26}$$
$$= \underline{83}$$

There are __83__ people on the bus now.

$$\begin{array}{r} 57 \\ +\ 26 \\ \hline 83 \end{array}$$

③ Tina brings 10 cans of orange juice and 8 cans of grape juice. How many cans of juice are there altogether?

$$\underline{10 + 8}$$
$$= \underline{18}$$

There are __18__ cans of juice altogether.

$$\begin{array}{r} 10 \\ +\ \ \ 8 \\ \hline 18 \end{array}$$
