

**TSA** Solve the following problems. (Show your working)

\$352

\$420

\$?

\$?

15. A remote control boat is 135 dollars more expensive than a teddy bear. How much does the teddy bear cost?

$$420 - 135$$

$$= 285$$

The teddy bear costs 285 dollars.

$$\begin{array}{r} 420 \\ - 135 \\ \hline 285 \end{array}$$

16. Tony had 700 dollars. After buying a watch, he still has 152 dollars. How much does the watch cost?

$$700 - 152$$

$$= 548$$

The watch costs 548 dollars.

$$\begin{array}{r} 700 \\ - 152 \\ \hline 548 \end{array}$$

- \*17. Gary has 800 dollars. After buying a school bag, how much money is left? Is the money left enough to buy a remote control boat?

$$800 - 352$$

$$= 448$$

448 dollars is left.

$$\begin{array}{r} 800 \\ - 352 \\ \hline 448 \end{array}$$

The money left (is/ is not ) enough to buy a remote control boat. (Circle the answer)  $448 > 420$
